

Open box - connection manual for motorcycle Yamaha TDR125

Connection

- 1) There is wire white/green connected from speedometer to ignition unit. Disconnect this wire and connect orange wire from Openbox to this wire (direction to ignition unit).
- 2) Blue wire from Open box connect to ground.
- 3) Disconnect 2pin connector at wires leads from front brake switch (wires green/yellow and brown). This connector is located under fuel tank. Insert connectors from Open box to this point.
